

In order to conquer the highest peaks, you need  
**REAL ROPE VEHICLES.**

**If you are planning a rigorous mountain tour, then your rucksack also needs to be up to the challenge //** It should be lightweight, rest snugly against your body and, at the same time, you should be able to enjoy a full range of motion. This is exactly where **TATONKA** begins working – with ultra-light alpine rucksacks that offer first-class carrying comfort, even during high levels of motion intensity.

The secret lies in the ingenious carrying system. It can be optimally adjusted to the hiker's back and in this fashion ensures perfect contact to the body. This is definitely a security-relevant criterion if you are travelling in the alpine terrain.

The product range now features two new alpine rucksacks: **Airy** and **Spot**. The Vent Comfort carrying system is the main element. It ensures optimal air circulation, excellent weight control and a secure fit.

Beyond that, both models contain practical details, including adjustable ice pick holder, elastic mesh pockets, lid with material attachment loops and a removable hip belt. You don't need anything more when you're in the mountains, but nothing less either.

---

**The new Spot 30 – the absolute lightweight Alpine rucksack //** The tangible evidence that even in rugged, high-altitude terrain you can travel with lightweight baggage.

**Read more about Spot 30 on Page 41.**

**The perfect alpine rucksack is robust and easy to carry** // For this reason, the innovative materials Cordura 100 Den Dobby and T-Rip Light were used in the manufacturing of the Airy and Spot rucksacks. Both are extremely robust and lightweight. Two decisive factors when dealing with sharp edges and steep inclines.

Every ounce of weight counts when ascending to considerable heights, since it is better to carry less weight. Good then that all **TATONKA** alpine rucksacks are absolutely lightweight. The **Cima de Basso** model shines through its specially designed concept.

## IN THE MOUNTAINS, YOU DON'T NEED ANY MORE. BUT NOT ANY LESS EITHER.

Anything that wasn't related to functionality or safety was left off of this model. The 35-litre alpine rucksack weighs in at only 850 grams. It has been designed with the tried-and-tested **Padded Back Vario Carrying System**, which optimally adjusts to the stature of the person carrying it and offers excellent control and weight distribution while still ensuring optimal flexibility. No wonder that the rucksack has been such a hit amongst climbers.

**Which one does what? An overview of the rucksacks and their equipment:**

	System	Volume in litres	Front loader	Top loader/lid compartment	Hiking stick attachment	Ice pick holder	Detachable hip strap	First-aid compartment (contents not included)	Hydration system compatible	Front pocket	Side pocket (for tent rods)	Ski holder

# AIRY 25 NEW

TREKKING	ALPINE	HIKING

**Lightweight alpine rucksack.** The new Airy 25 is a real lightweight and therefore ideal for alpine use. Aside from the low weight, the Airy 25 is especially defined by its extreme carrying comfort, which is ensured by the Vent Comfort Carrying System with centrally positioned ventilation channel and breathable AirTex cover, the detachable padded belt strap and the S-shaped AirMesh shoulder straps. The comprehensive accessories are also convincing: the lid has loops for fastening material, the protective canvas protects the rucksack from the sharp edges of externally attached equipment and there is also an adjustable hiking stick and ice pick attachment as well as a rope attachment.

**Features:** ① Pre-shaped Vent Comfort Carrying System ② Detachable padded hip strap ③ S-shaped AirMesh shoulder straps ④ Lids with loops for material fastening ⑤ Front compartment for protective canvas ⑥ Strengthened frontal fastening straps ⑦ Adjustable hiking stick and ice pick attachment ⑧ Rope attachment ⑨ Expandable side compression – can be used as a ski attachment ⑩ Elastic mesh side pockets **Material:** T-Rip Light/Cordura 100 Den Dobby

**Article:** 1483 Airy 25

**Colours:** 015 red, 039 lemon, 040 black, 194 bright blue

**Weight:** 1.00 kg

**Dimensions:** 57 × 22.5 × 14 cm

**Volume:** 25 l

**Lightweight and comfortable alpine rucksack.** The Spot 30 guarantees first-class carrying comfort – through its light weight and the pre-formed Vent Comfort Carrying System – even during demanding mountain tours. This system contains a centrally aligned ventilation channel and a breathable AirMesh cover that creates a pleasant air circulation on the back; two concave-shaped foamed plastic strips attached to the side ensure optimal weight distribution, even when moving quickly. And even the features of the front loader are quite attractive: the lid has loops for material fastening and a pocket for the protective cover; there is an adjustable hiking stick and ice pick, a rope attachment and an expandable side compression that can be used as a ski attachment.

**Features:** ① Pre-shaped Vent Comfort Carrying System ② Detachable padded hip strap ③ S-shaped AirMesh shoulder straps ④ Lids with loops for material fastening and compartment for protective cover ⑤ Adjustable hiking stick and ice pick attachment ⑥ Rope attachment ⑦ Expandable side compression – can be used as a ski attachment ⑧ Elastic mesh side pockets

**Material:** T-Rip Light, Cordura 100 Den Dobby

# CIMA DI BASSO 35

TREKKING	ALPINE	HIKING

blue / carbon

black

**Plain alpine rucksack.** With its reduced but well-designed features, the Cima di Basso 35 will impress on any mountain. This alpine lightweight weighs in at just 850 grams. The pre-shaped Padded Back carrying system and the detachable belt hip strap guarantee that it sits well against the body – even when a lot of movement is involved. The top compression always keeps the rucksack in place, and can also be used to attach climbing ropes. And apart from all of that, the single-chamber rucksack is visually pleasing to boot.

**Features:** ① Pre-shaped Padded Back carrying system ② Detachable belt hip strap ③ Material loops ④ Lid compartment ⑤ Hiking stick/ice pick attachment ⑥ Rope attachment ⑦ Side compression with lockable buckle ⑧ Key holder

**Material:** Textreme 6.6, 450 HD Polyoxford

**Article:** 1491 Cima Di Basso 35

**Colours:** 040 black, 116 red / carbon, 137 blue / carbon

**Weight:** 850 g

**Dimensions:** 62 × 36 × 20 cm

**Volume:** 35 l
