

TATONKA brings the great outdoors **INTO THE OFFICE.**

Anyone who has experienced the quality of real outdoor products will want to use them in their everyday lives too // TATONKA has also developed its office and multimedia products in terms of the durability and product life – with a high demand on both material and workmanship. After all, whatever works for a rucksack, can't be wrong for an office bag either.

If you want to take your office with you, sensitive devices such as laptops, mobile phones and cameras require sufficient protection. They will feel especially well protected in protective cases made from rugged neoprene. This material reliably protects contents from bumps and splashes. The neoprene cases from TATONKA are also available in many different sizes and colours – you'll find the right solution for every device, regardless of its size and shape.

Even in terms of its functionality, the office and multimedia bags can live up to their outdoor counterparts: the new **Office Bag**, due to its storable rucksack shoulder straps, can be carried either as a bag or a rucksack. With the **Workstation**, an all-round padded laptop bag, your device does not even have to be removed from the protective case if you want to use it.

And the fact that the appearance of our office and multimedia products has not been compromised in the name of quality and functionality, can be seen on the next few pages.

The new **Office Bag** makes working a whole lot easier // On the go, the bag is easy to carry and customised to meet all demands in your daily business.

Read more about the **Office Bag** on page 190.
