

Tasmanian Tiger. We Equip The Professionals.

The current situation has massively increased demand for **TASMANIAN TIGER** products from our NATO partners and various security agencies. At the same time, the supply chain issues triggered by the Corona pandemic continue to show their effects.

As a premium supplier of professional military and police equipment, the functionality and quality of our products remain our top priority, and our in-house production means that we reliably meet these demands - even under the current more difficult conditions.

In order to meet the needs of users, we are consistently developing our product range and have expanded our tactical range in particular.

The new **ZP SERIES** enables the quick change of pre-configured modules on the appropriately equipped plate carrier. The **TT PLATE CARRIER QR LC ZP** features zippers on the back. A panel, a tactical deployment pack, an emergency pack and a breacher pack are available as zip-on modules.

The products of the **ANFIBIA SERIES** are especially designed for amphibious operations. They feature skeletonized construction, seawater-resistant materials and drain holes or the use of mesh material for rapid water drainage. The robust **TT PLATE CARRIER QR SK ANFIBIA MK II** is supplemented by a replacement front panel and various magazine and accessory pouches.

We also present three new small backpacks for special applications and flexibly combinable tactical equipment pouches.

Even in uncertain times, TASMANIAN TIGER remains your reliable equipment partner.

TASMANIAN TIGER - COMPETENCE IN CARRYING

Tasmanian Tiger has a long-standing experience in backpack construction and proven expertise in high-performance backpack carrying systems.

When developing our backpacks, we place great value on ergonomic design, durable materials, functionality, and a perfect fit. For long journeys with a heavy load, the most important thing is the comfort of the backpack. That is why, in addition to the selection of the right pack sack, the selection of the right carrying system plays a central role.

The heart of a Tasmanian Tiger carrying system revolves around an internal frame structure that transfers the weight of the pack sack to the hip muscles via the hip belt. This transfer assures that pressure is relieved from the shoulders and spine. It is a basic fundamental that the heavier the load the more stable the support system must be.

However, the load transmission should not be completely stiff, but must remain flexible enough to ensure that even in rough terrain, the user can be agile in his/her movements, especially when traversing large obstacles. For the load transfer to work optimally, the carrying system must also function for various sized individuals. To ensure this, the Tasmanian Tiger carrying systems are adjustable in size and can be custom fit to a wide range of back lengths.

Because a backpack not only has to fit the application, its respective requirements, and the user, we have developed different carrying systems for different backpack models, shown on the following pages.

Tasmanian Tiger – carrying systems for every mission.

X1-SYSTEM

The size-adjustable high-end X1 Carrying System was specially developed for high loads over 40 kg. Particular attention was paid to the adjustability, ergonomics and ventilation of the system. Durable materials, multi-layered structures and reinforcements in the right places make the system stable and durable.

V2-SYSTEM

The size-adjustable V2 Carrying System was developed for medium to high loads up to 40 kg. A combination of aluminum and fiberglass bars results in an excellent balance of efficiency and flexibility in load transmission with low own weight. Channels on the back padding ensure good air circulation.

V2 PLUS-SYSTEM

The size-adjustable V2 Plus Carrying System was developed for medium to high loads up to 40 kg. Backpacks with this system offer great adjustability of the back length and can be worn even with fully loaded vests and chest rigs due to the detachable hip belt.

X VENT ZERO PLUS-SYSTEM

The X Vent Zero Plus Carrying System combines excellent ventilation with perfect fit and low weight. The tension of the system can be used to regulate the distance from the backpack to the back, right up to force fit carrying.

TT MIL OPS PACK 80+24

Size / Volume: 65 x 32 x 24 cm / 52 I (48 I + 2x 2 I)

Weight: 2,90 kg

CORDURA® 700 den IRR Material:

Classic military backpack with a total capacity of 52 liters and V2 Plus Carrying System. The TT Raid Pack MK III has a main compartment with a volume of 48 liters and two fixed side pockets with a volume of 2 liters each. MOLLE on the front, the lid, the side pockets and on the hip belt allows individual extension. The V2 Plus Carrying System of the backpack is designed for a weight of up to approx. 40 kilograms and offers great variability when adjusting the back length. Due to the removable hip belt, the backpack can also be carried with fully equipped chest rigs and vests. The hip belt can be used separately as a Warrior Belt.

[1] V2 Plus Carrying System [2] Divided main and bottom compartments [3] Fixation for

hiking poles or ice axes [4] Height-adjustable chest belt [5] Removable, padded hip belt [6] Side compression straps [7] Compression around perimeter of base [8] Handles at sides [9] Lid with gear loops [10] Easy-access pocket on top of lid [11] Hydration system compatible [12] Stitched bellow pocket with water drain [13] Gear loops [14] Document storage pocket on the inside of the lid [15] Capacity: main backpack 48 | side pockets each 2 | [16] Antenna ports into the main compartment [17] Hip belt can be used separately as a Warrior Belt [18] Side pockets with external MOLLE system [19] MOLLE system on all the important attachment areas

The items are equipped with the same features. Item 7209 is made of Cordura® 700 den with IRR treatment.

TT MODULAR TROOPER PACK

Item number: 7263

Color: 040 black, 331 olive, 343 khaki, 346 coyote brown

Size / Volume: 62 x 34 x 19 cm / 55 l

Weight: 2,75 kg

Material: CORDURA® 700 den

Universal military backpack with two attachable pockets and the V2 Plus Carrying System. Based on the predecessor model, the TT Modular Trooper Pack offers an optimized arrangement and new functional features. The main compartment opens completely, and the special zipper guides make it possible to use the pack as a top loader. The back panels of the front and main compartment feature MOLLE hook-and-loop for customized loading, and both front pockets have zipper mesh pouches to organize your gear. Laser-cut MOLLE on the front and sides allow you to add pouches or extra gear as you see fit. The backpack has an integrated rain cover and a removable hip belt that can also be used as a Warrior Belt. The back panel can be adjusted to different back lengths.

Flexible "soft" load carrier for transporting heavy loads. The TT Base Carrier features a high-performance internal backpack carrying system with three-dimensionally shaped, removable hip belt. The carrier platform features a MOLLE system as well as side loops for various attachments. The TT Base Carrier can be flexibly built up with modular elements, for example with the TT Base Carrier Flap (Art 7332) or the TT Front-Side Pouch SET (Item 7391). The TT Base Carrier Pack (Item 7374) completes the load carrier to a full-fledged backpack. Carrying capacity up to 55 kg.

[1] X1 Plus Carrying System [2] Load control straps [3] Height-adjustable chest belt [4] Side compression straps [5] Internal reinforced frame system [6] Loop system for various fastening systems [7] Compatible with TT Base Carrier Pack (item 7374), TT Front-Side Pouch 16 Set (item 7391), TT Modular Quiver Set (item 7392), TT Base Carrier Flap (item 7232)

The TT Base Carrier Pack complements the TT Base Carrier System to a full-fledged backpack and is attached to the load carrier with hooks. The pack sack pulls open completely for easy operation. In addition, for use without the load carrier, it has attachment options on the back for attaching the shoulder and waist belt of the TT Base Carrier System.

[1] Compression strap [2] Handle [3] Main compartment with lockable slider [4] Antenna ports into the main compartment [5] Pack sack for the TT Base Carrier System (item 7330) [6] Possibility to mount the shoulder straps and the waist belt of the TT Base Carrier (item 7330) [7] Can be fixed to the TT Base Carrier (item 7330) with hooks [8] MOLLE system on all the important attachment areas [9] Laser-cut MOLLE system [10] MOLLE hook-and-loop on the inside for limitless modularity

TT COMPANION 30

021 titan grey, 040 black, 331 olive, 346 coyote brown Color:

Size / Volume: 55 x 28 x 19 cm 915 g / 30 I Weight:

Material: CORDURA® 700 den / T-Square Rip FD

Modular loadable daypack with 28 liters of volume. The TT Modular Tac Pack 28 is also suitable for loading more weight due to the reinforcement of the back system with a PE plate and an aluminum rail. For this purpose, it also has a preparation for attaching the sturdy TT Molle Hip Belt (a simple webbing hip belt is included). The backpack features a fully expandable main compartment with shallow mesh pockets, four small mesh side pockets, and MOLLE hook-and-loop areas for customization. The MOLLE system on the front pocket and sides can be used to attach additional gear. There is also an attachment option for tripods or poles. Two completely circumferential compression straps are used for volume adjustment

[1] Padded Back Carrying System [2] Height-adjustable chest belt [3] Removable webbing hip belt [4] Preparation for hip belt fixation (item 7286 TT MOLLE Hip Belt) [5] Two removable, fully wraparound compression straps [6] Extra-durable handle [7] Hydration system compatible [8] Side attachment option through bungee cord, e.g. for sticks or tripods [9] Flat mesh pockets inside [10] Front pocket with zipper [11] Detachable rear panel with aluminium frame (can be shaped individually) [12] MOLLE system on both sides and front pocket [13] Laser-cut MOLLE system [14] MOLLE hook-and-loop on the inside for limitless modularity

The items are equipped with the same features. Item 7399 is made of Cordura® 700. Item 7325 is made of Cordura® 500 den with IRR treatment.

This lightweight, sleek daypack with Thermo Mold Back System offers 30 liters of volume. The top loader features a large MOLLE hook-and-loop patch on the back panel of the main compartment for individual configuration, and it can be reduced in volume by internal compression straps. The backpack also offers the possibility to fix a hip belt.

[1] Thermo Mold Carrying System [2] Height-adjustable chest belt [3] Variable attachment points for a hip belt [4] Side compression on the inside [5] Handle [6] Lid with zip pocket [7] Hydration system compatible [8] Daisy chain on the front [9] Large MOLLE hook-and-loop patch inside [10] Lid with zip pocket [11] Inclusive elastic loop

TTT SURVIVAL PACK IRR

Weight: 1,36 kg

Material: CORDURA® 700 den IRR

Escape and survival backpack for personal equipment. The TT Survival Pack offers the right size and equipment for the most important survival utensils. The fully expandable main compartment features six pockets of varying sizes with transparent lids, four of which can be removed. The main compartment is also covered with a large MOLLE hook-and-loop area, which allows for individual additions. The bottom compartment contains a double-sided rain cover (one side with stripes in warning orange) and a tac marker. Two shallow zippered compartments on the front are great for storing documents, for example. Additional pockets or panels can also be hooked into the existing hooks on the front. Backpack shoulder straps as well as carrying handles can be stowed when the backpack is stored in vehicles.

[1] Padded back [2] Two stowable shoulder straps [3] Carrying handles can be stowed in side pockets [4] Height-adjustable chest belt [5] Hook-and-loop closure patch on the frontside (loop) [6] Two zipped front compartments [7] Internal variable fixation points [8] Daisy chain on the front [9] Includes hook-and-loop strips that can be labeled [10] Integrated reversible rain cover with marker system in the bottom compartment [11] Two removable, hook-and-loop inner pockets (4 I and 2.5 I) with transparent lid [12] Four fixed inner pockets (1x 6 I, 1x 2,5 I, 2x 0,5 I) with transparent lid [13] Separate compartment for the use of a hydration system

[14] Integrated visual markers [15] Large MOLLE hook-and-loop patch inside [16] Two hooks for attaching additional pouches or panels on the front side

Items 7516, 7680 and 7675 have identical features. Item 7680 is made of Cordura® 500 den. Item 7675 is made of Cordura® 700 den with IRR finish.

Light, tactical deployment backpack for modular use. The materials used for this deployment backpack are very light, making it super easy to handle. It has a flat main compartment that is hydration system compatible and the back panel is fitted with MOLLE hook-and-loop for customizable loading of your gear. The upper front pocket of the backpack is a flip-top behind which you can attach a magazine holder (three M4 magazines or 4 pistol / MP7 magazines, included with purchase). Both middle front pockets are removable and behind each is a MOLLE hookand-loop surface. Both the TT Tac Pouch 12 (item 7862) or the TT 2 SGL Backup Mag Pouch M4 (item 7811) can be attached to the lower front pocket. The backpack has a MOLLE reverse system on the back so you can integrate it into a plate carrier. You can also use an included adapter to attach it to plate carriers.

[1] Hydration system compatible [2] Main compartment opens out completely [3] One narrow main compartment [4] Hook-and-loop strips for name tag [5] Capacity: main compartment 9 I, upper front pocket 2 I,

middle front pockets each 1 I, lower front pocket 1 I [6] Removable bungee cord compression [7] Weight backpack without shoulder straps: 735 g [8] Interchangeable magazine inserts for 3 x M4 (PMAG) magazines (50 g), 4 x pistol / MP7 magazines (40 g) [9] MOLLE reverse system [10] Laser-cut MOLLE system [11] MOLLE hook-andloop on the inside for limitless modularity [12] MOLLE system on the upper front pocket [13] Removable center pockets, underneath MOLLE hook-and-loop [14] Combinable with TT Plate Carrier QR LC as rear section

The items are equipped with the same features. Item 7309 is made of Cordura® 500 den. Item 7308 is made of Cordura® 500 den with IRR treatment.

The Modular Gunners Pack can be combined with e.g. 7080 TT 2 SGL BACKUP MAG POUCH M4 IRR and 7076 TT Tac Pouch 12 IRR.

TT MODULAR CAMERA PACK 30

Size / Volume: 58 x 28 x 19 cm / 30 l

Weight: 2,40 kg

Material: CORDURA® 700 den

Modular backpack conceived as a camera and documentation pack. The main compartment features front access and an extra top opening so you can quickly grab your camera. The interior of the backpack has adjustable partitions for cameras and lenses; the partitions can of course be removed completely. A little organizer pocket for memory cards and filters can also be removed. The backpack has a lid pocket and deep side pockets that are meant to hold a tripod and can be secured with lateral compression straps. The padded back panel system, which includes the padded hip belt, makes the backpack super comfortable to carry. The hip belt with laser-cut MOLLE can also be used to attach accessories, for example lens pouches, and can be removed at any time. The shoulder strap also has a camera fastener. The rain cover in the bottom pouch of the backpack completes the list of features. [1] Padded Back Carrying System [2] Height-adjustable chest belt [3] Compression strap [4] Handles [5] Lockable zipper slider [6] Lid with zip pocket [7] Integrated rain cover inside the bottom compartment [8] Side pockets [9] Hook-and-loop closure patch on the frontside (loop) [10] Zipped front opening [11] Large zipped opening [12] Functional interior layout for camera and accessories [13] Camera holder on the shoulder strap [14] Tripod fixation [15] Removable zip-up bag [16] Hook-and-loop patch on the inside (loop) [17] Removable hip belt, can be used separately as a Warrior Belt [18] Laser-cut MOLLE system [19] Detachable rear panel with aluminium frame (can be shaped individually)

Modular backpack conceived as a camera and documentation pack. The focus here is on comfort and usability. The main compartment features front access and an extra top opening so you can quickly grab your camera. The interior of the backpack has adjustable partitions for cameras and lenses; the partitions can of course be removed completely. A little organizer pocket for memory cards and filters can also be removed. The backpack has a lid pocket and deep side pockets that are meant to hold a tripod and can be secured with lateral compression straps. Laser-cut MOLLE on the sides and front can be used to add gear as you see fit. The padded back panel system, which includes the padded hip belt, makes the backpack super comfortable to carry. The hip belt with laser-cut MOLLE can also be used to attach accessories, for example lens pouches, and can be removed at any time. The shoulder strap also has a camera fastener. The rain cover in the bottom pouch of the backpack completes the list of features.

[1] Padded Back Carrying System [2] Height-adjustable chest belt [3] Compression strap [4] Handles [5] Lockable zipper slider [6] Lid with zip pocket [7] Integrated rain cover inside the bottom compartment [8] Functional interior layout for camera and accessories [9] Camera holder on the shoulder strap [10] Removable zip-up bag [11] Removable hip belt, can be used separately as a Warrior Belt [12] Laser-cut MOLLE system [13] removable back plate with aluminum rail (individually formable)

Weight: 90 g

Material: Polyester Webbing

Practical camera holster for attachment to backpack shoulder straps, suitable for many backpack models. The adjustable holder (up to approx. 9.5 cm lens diameter) fixes the ready-to-use camera for immediate access and thus relieves the neck. The attachment to the shoulder strap via webbing and hook-and-loop closure. The neck strap of the camera must be used as an additional backup. To maintain the balance, a lens length of at least 8 cm is recommended, but this depends on the camera weight.

[1] Hook-and-loop closure [2] To be used on shoulder straps [3] To secure a loop or a D-ring on the shoulder belt is needed

The new **ZP Series** from Tasmanian Tiger allows the quick change of pre-configured modules on the appropriately equipped plate carrier: The **TT Plate Carrier QR LC ZP** features zippers on the back, the panels and packs are simply inserted and zipped on. The plate carrier is delivered including a zipped-on panel, but the **TT Molle Panel ZP** is also available separately as an interchangeable panel. In addition, the tactical **TT Operator Pack ZP**, the emergency pack **TT Medic Assault Pack S ZP** and the breacher pack **TT Tool Pack ZP** are available as zip-on modules. Furthermore, the zippered MOLLE strips included in each case provide the option of attaching them to all plate carriers with six MOLLE stripes via the MOLLE system.

NIGHT CAMOUFLAGE

THE TT PRODUCT RANGE EQUIPPED WITH IRR PROTECTION

Tasmanian Tiger manufactures tactical equipment of the highest level and addresses the security issue of camouflage, under the observation of night vision devices, with an extensive product range.

Chest rigs and plate carriers, mission and medic backpacks as well as magazine pouches, tactical pouches and daypacks are offered in the color **stone grey olive with certified IRR treatment**.

Both the CORDURA® materials as well as webbing, hookand-loop fasteners and buckles meet the high German Bundeswehr standards TL 8305-0278 and TL 8305-0281 with regard to the IRR camouflage effect (IRR 650 - 1250nm / 10 - 42%).

1

Tasmanian Tiger's RFID Block Series wallets, document cases and pouches offer 100% protection from data theft by radio-based readers or NFC smartphones with a readout app. The Cryptalloy® film built into the products securely shields radio waves of all commercial frequencies used in the field, making readout virtually impossible.

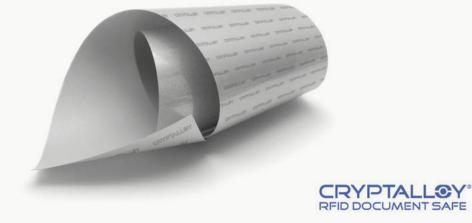

Possible consequences of data theft:

identity theft, loss of credit, exposure of behaviour and movement profiles, unauthorised access to business and/or private premises, etc.

TASMANIAN TIGER uses Cryptalloy®, a special metal alloy made by Kryptronic Technologies of Munich, for its RFID Block products. Compared with regular metallised foils, coatings and fabrics of the same strength and flexibility that still allow a proportion of the radio frequency through, Cryptalloy® almost completely blocks the signal (remaining signal no longer measurable). Cryptalloy® has been tested by SGS/TÜV Saarland Foster GmbH, and is confirmed and certified as suitable for screening against the unauthorised reading of RFID chips (including remote chips, NFC) on commercial frequencies 125 kHz, 13.5 MHz and 900 MHz. What is significant is the protection on frequency 125 kHz. Protection against this frequency guarantees maximum protection against all the usual RFID frequencies.

Water column: 1.500 mm
Material: T-Cover Tex

Waterproof rain poncho with hood and zipper-close sides. A large zipper opening in the front allows for quick-access to the front panels.

[1] Including stuff bag [2] Two-way zipper in the side seams [3] Zipper closure front opening for underlying chest rigs [4] Fixation securing fabric in heavy wind conditions [5] Taped seams [6] Hood with drawstring and cord stopper [7] Sleeve ends with press studs for adjustment [8] Logo print

TT REEPSCHNUR / 20 M

Item number: 7885

Color: 040 black, 331 olive, 346 coyote brown

Size: 4 mm x 20 m
Weight: 135 g
Material: Nylon

4 mm cord, 20 m length.

WARNING: This item is not a safety product - not suitable for rock climbing!

TT SR25 SAFETY HERMA QA (PAIR)

Item number: 7874

Color: 040 black, 331 olive, 346 coyote brown

Size: 65 x 40 mm
Weight: 25 g (pair)
Material: Acetal

Variable insert buckle, suitable for 25 mm webbing. The bar can be opened and allows threading into sewn loops or lasered slots. The parts of the buckle can also be combined individually with buckles of the same design, as no counterpart is required.

[1] Sold in pairs [2] Suitable for 25 mm webbing

TT WEBBING STRAP 18 MM - 0,75 / 1 / 1,5 / 3 M

Item number: 7217 / 7218 / 7219 / 7220

Color: 331 olive

Size: 75 x 1,8 cm, 100 x 1,8 cm, 150 x 1,8 cm, 300 x 1,8 cm

Weight: 32 g / 36 g / 42 g / 84 g

Material: Nylon Webbing

Pack strap for minimising volume. This strap enables you to compress your luggage and save volume. Or the strap can be used to attach baggage to the outside of your rucksack.

[1] Length-adjustable

TT HIP BELT 25 MM / 38 MM

Color: 040 black, 331 olive, 346 coyote brown

Size: 110 x 2,5 cm, 110 x 3,8 cm

Weight: 50 g / 80 g Material: Nylon Webbing

Functional waist belt for ergonomic carrying. This accessory for compatible backpacks is simply attached to the existing eyelets at hip height to add

extra stability.

[1] Length-adjustable

TT BUNGEE CORD SET

Item number: 7346

Color: 040 black, 331 olive, 346 coyote brown

Weight: 85 g (Set)

Material: TPU Nylon 420 den, Elastic String, Acetal

Fastening set for individual assembly and as a replacement. Consisting of 6 meters of bungee cord, Nylon magazine fasteners and 6 cord stoppers.

[1] Including 6 m bungee cord [2] Including Nylon magazine catches [3] Including 6 cord stoppers

TT SR 25 MOLLE

Item number: 7881

 Color:
 040 black, 331 olive

 Size:
 4,5 x 3,4 cm

 Weight:
 20 g (pair)

 Material:
 Acetal

Side release buckle for horizontal and vertical fixation on any MOLLE system. [1] Sold in pairs [2] Suitable for 25 mm webbing

TT SR 25 / SR 38 / SR 38 DUAL / SR 50 DUAL

Item number: 7882 / 7883 / 7887 / 7884 **Color:** 040 black, 331 olive, 343 khaki

Size: 6 x 3,5 cm / 7 x 4,8 cm / 7 x 4,8 cm / 8 x 6 cm

Weight: 12 g / 22 g / 22 g / 34 g

Material: Acetal

Quick-release buckle for repairs and replacement, available in the sizes 25 mm, 38 mm, and 50 mm.

[1] Three sizes [2] Suitable for 25 mm webbing (SR 25)

TT SR 25 V MOLLE

Item number: 7886

 Color:
 040 black, 331 olive

 Size:
 4,5 x 3,4 cm

 Weight:
 20 g (pair)

 Material:
 Acetal

Side release buckle for vertical fixation on any MOLLE system.
[1] Sold in pairs [2] Suitable for 25 mm webbing [3] For vertical use only

TT CARRYING STRAP 50 MM

Item number: 7210

Color: 040 black, 331 olive **Size:** 120 x 5 cm

Weight: 130 g

Material: CORDURA® 700 den, Nylon Webbing

Padded shoulder strap. The length of the shoulder strap can be individually adjusted and is very comfortable to carry thanks to the sewn-in shoulder padding.

[1] Size-Adjustable carrying strap with shoulder pad [2] Secret pocket under hook-and-loop patch, e.g. for coins [3] Includes two metal snaphooks [4] NON-slip material [5] Hook-and-loop surface (loop) for patches etc.

TT SR 25 SAFETY QA

Item number: 7278

Color: 040 black, 331 olive, 346 coyote brown

Size: 6 x 3,5 cm
Weight: 24 g (pair)
Material: Acetal

Strong, quick-release multipurpose buckles for vertical attachment to MOLLE systems and to the various gear loops.

[1] Sold in pairs [2] Suitable for 25 mm webbing [3] SR buckle (female) for hanging in MOLLE or loops

Item number: 7211

Color: 040 black, 331 olive, 346 coyote brown

Size: 27 x 7 cm **Weight:** 40 g

Material: CORDURA® 700 den

Shoulder pad to make carrying heavy loads easier. Absorbs the load transfer on the shoulder and fits on a strap up to 5 cm wide.

[1] Extra shoulder cushion for heavier loads [2] Secret pocket under hookand-loop patch, e.g. for coins [3] NON-slip material [4] Hook-and-loop surface (loop) for patches etc.

FAIR & TRANSPARENT PRODUCTION

TRANSPARENCY INSPIRES TRUST

Tasmanian Tiger products are made according to European manufacturing standards under high social conditions at our own factories in Vietnam. You are very welcome to visit our factory Mountech Co. Ltd. on any friday and experience how it operates.

www.openfactory.tatonka.com

MATERIAL OVERVIEW (Selection of materials)

CORDURA® 500 DEN (100% polyamide). Made from INVISTA high tenacity, air-jet textured Nylon 6.6 in 500 denier. The CORDURA® brand provides fabrics that are recognized for their long-lasting durability and resistance to abrasions, tears and scuffs; they are more durable than other fabrics. CORDURA® fabric offers a superior strength-to-weight ratio, making it a first-choice for durable fabrics.

CORDURA® 700 DEN (100% polyamide). CORDURA® in fibre thickness 700 den combines the high wear and tear resistance of the classic 1000 den fabric with the lightness of the 500 den fabric.

CORDURA® WITH IRR PROTECTION Tasmanian Tiger manufactures tactical equipment in the color stone grey olive with certified IRR treatment. Both the CORDURA® materials as well as webbing, hook-and-loop fasteners and buckles meet the high German Bundeswehr standards TL 8305-0278 and TL 8305-0281 with regard to the IRR camouflage effect (IRR 650 - 1250nm / 10 - 42%).

The Japanese company **YKK** is the global leader in zipper manufacturing and has a vast array of products in its range. Tasmanian Tiger has used YKK zippers for many years in its collection, in particular the tear-resistant YKK zippers with RC (Racquet-Coil) technology.

The YKK Fastening Products Group is trusted worldwide for impeccable production standards and thorough quality control processes.

The South Korean plastic buckle manufacturer, Woojin, operates a production site in Vietnam, which means resource-friendly transport distances between our facilities. Woojin and Tasmanian Tiger have been working together for so many years we're almost like family. The relationship includes not just development coordination but also exclusive fabrication. Tasmanian Tiger uses **WOOJIN** components throughout its entire range of products.

The side release buckles, zipper pulls, etc. made by **W00JIN** have inspired top designers worldwide to innovate the next generation of tactical products.

T-SQUARE RIP FD (100% Polyamid) The very tight, special weave of the 210 den fibers makes this fabric extremely stable, but it remains extremely light. By using FD yarn (full-dull) the fabric gets a dull surface.

420 HD NYLON (100% polyamide). The classic 420 den Nylon material has proved itself in the "high density" (HD) version as a good, very flexible basic material. The 420 den yarn gives it a very high tear resistance. The material is made waterproof by the triple PU coating.

TEXTREME 6.6 (100% polyester). The textured polyester material in 600 den threads is robust, colorfast and versatile. PU-coated to achieve a weatherproof finish.

CRYPTALLOY® (aluminium alloy). Screening products with the specially developed tear-resistant material CRYPTALLOY® offer the highest level of protection against RFID/NFC attacks. The TÜV certified material blocks radio waves on all the usual RFID frequencies and can be used for all cards.

110 DTEX PA6.6 SILICON (100% polyamide). Lightweight, double-sided silicone-coated and printed Nylon fabric in 5-color camouflage. The material according to TL 8305-0278 is used for rain covers.

T-COVER TEX (100% polyester). This very light, waterproof material made out of polyester is pleasantly soft to the touch, and is used mainly for rain ponchos, rain covers and stuff bags.

T-SOFTSHELL 3L (Outer layer: 100% Polyamide, inner layer: 100% polyester, membrane: 100% polyurethane). This technical 3-layered Softshell material has a polyamide outer and a soft micro-fleece inner side, is wind- and water repellent as well as breathable.

T-Vent 3L (Outer layer: 92% polyamide, 8% elastane, inner layer: 100% polyamide, membrane: 100% polyurethane). This robust, elastic, wind- and waterproof 3-layered material is used for high-quality hardshell jackets. This ultrathin non-porous membrane is extremely waterproof and offers a high air permeability and stretchability.
